

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A container for storing and applying a liquid deodorant, comprising:
a tubular body comprising:

an end nozzle (11) in the form of a spherical annular bearing retaining a sphere (20), free rotating and projecting partially outwardly from the tubular body (10), and

a tubular cap (30) to be fitted to the tubular body (10), in order to cover the end nozzle (11), comprising an end wall (31) that defines a seating surface for the container in an inverted position, with the end nozzle (11) facing downwardly, ~~characterized in that~~ wherein the end wall (31) of the cap (30) defines, internally, a concave cradle (32) in the form of a spherical calotte, inside which a corresponding portion of the sphere (20) is seated when the cap (30) is fitted to the tubular body (10).

2. (Currently Amended) The container as set forth in claim 1 wherein, ~~characterized in that~~ the concave cradle (32) is defined by a corresponding median deformation of the end wall (31) of the cap (30).

3. (Currently Amended) The container as set forth in claim 2 wherein, ~~characterized in that~~ the seating surface of the container is defined by a peripheral annular portion (33) of the end wall (31) of the cap (30).
